WORK EXPERIENCE

Novadeha SAS Web Developer

2023 JUN - Current

Development of simultaneous projects:

The first (between in the middle of development) total change of the front, (Laravel, Blade and Javascript Vanilla) assembling structures to have controlled and reuse code with Javascript Vanilla in the Front, in charge of different functionalities like Calendars, chat with websockets (websockets beyondcode) type whatsapp privately for the CRM and more functionalities and exahusive refactoring in datatables, etc.

The second one with Vue, Typescript, Inertia and Laravel building from scratch an architecture in the front end not only using the Vue Framework architecture but adapting it to Inertia for medium to large projects, plus development of main functionalities in the administrative panel and in progress.

Freelancer - Bikdyne Web Frontend Developer

2023 APR - 2023 JUN

Develop functionalities to specific assigned modules. Using Typescript, React and Next.

Validating forms and assigning captchas to specific forms of the application.

Connecting specific endpoints to submit handlers. Layout and fix layouts with Tailwind.

Freelancer Profesional Web Frontend Developer

2022 DEC - 2023 MAR

Develop functionalities, layout, and logic. Integrate JWT client-side with Redux TLK and Context for user data state management. Handle API errors using Axios Interceptor, and display with Notistack. Enhance performance, organization, debugging; validate forms and implement Captcha V3.
