WORK EXPERIENCE

Freelancer - Bikdyne

Web Frontend Developer

2023 APR - Present

Develop functionalities to specific assigned modules. Using Typescript, React and Next. Validating forms and assigning captchas to specific forms of the application.

Connecting specific endpoints to submit handlers. Layout and fix layouts with Tailwind.

Freelancer Profesional

Web Frontend Developer

2023 JAN - 2023 APR

To consult a professional project with experienced frontends, to be able to explain in a technical way how the technologies and/or dependencies used in this project are organized (frontend side) and how they are being used.

Integrate the JWT on the client side thus handling the states that correspond to the user data with the Redux TLK and Context. Handle possible errors in the main Api created with Express and MongoDB with Axios Interceptor and paint on screen with Notistack. Improve application performance, code organization and debugging. Develop functionalities, validating forms and implementing Captchas (V3).

Freelancer

Teaching Javascript and React

2022 SEP - 2022 DEC

On a facebook page I got clients to explain Javascript on DOM, asynchronism and vanilla organization as well as React on custom hooks, clean architecture and state management with Context and Redux TLK.
